Professional Experience Summary

Profile:

I'm a highly skilled and enthusiastic web developer with expertise in Python, HTML/CSS, JavaScript, PHP, and MySQL. With a passion for creating dynamic and interactive web applications, I am dedicated to delivering high-quality solutions that meet clients' needs.

Python:

I possess advanced proficiency in Python, a versatile and powerful programming language. I have hands-on experience in leveraging Python's extensive libraries and frameworks to develop robust and efficient web applications. Whether it's building scalable backend systems, implementing data processing algorithms, or creating automation scripts, I can effectively utilize Python to tackle diverse programming challenges.

HTML/CSS:

My strong command over HTML and CSS allows me to create visually appealing and user-friendly web interfaces. I have a deep understanding of semantic markup, responsive design principles, and cross-browser compatibility. By employing modern CSS frameworks and techniques, I can build elegant and intuitive user interfaces that enhance the overall user experience.

JavaScript:

I am well-versed in JavaScript, a key language for developing dynamic and interactive web applications. It's implementing complex client-side logic, AJAX functionality, or integrating third-party APIs, I can leverage JavaScript to create seamless and engaging web experiences.

PHP and MySQL:

I have a strong background in PHP, a popular server-side scripting language, and MySQL, a widely used relational database management system. I can proficiently develop back-end systems, design database schemas, and write efficient SQL queries. My experience includes building custom content management systems (CMS) and web applications that handle large amounts of data. I am adept at optimizing database performance and ensuring data security.

Work Experiences

DATE	EMPLOYER	TITLE
2020 October to march 2021	Somali Online Market (SOOMAR)	Operations Assistance

My role and responsibilities as Operations Assistance are:

- ✓ **Handling Computer-Based Tasks:** You were responsible for managing various computer-based tasks within the operations department. This could involve using software, tools, and systems to perform tasks efficiently.
- ✓ **Maintaining Computers and Related Devices:** You played a role in ensuring that the computers and related devices used in the operations department were well-maintained and functioning properly. This could involve troubleshooting technical issues, performing updates, and keeping the hardware in good condition.
- ✓ **Establishing Working Relationships:** You worked on building positive and effective working relationships with both customers and other professionals within the organization. This likely involved clear communication and collaboration to ensure smooth operations.
- ✓ **Assisting Customers:** You assisted customers by addressing their requests and resolving any problems they encountered. It's important to provide prompt and accurate assistance to enhance the customer experience.
- ✓ **Data Entry and Spreadsheet Creation:** You were involved in data entry tasks and specifically mentioned creating Excel spreadsheets. This might have included organizing, inputting, and analyzing data to support the operations department.

DATE	EMPLOYER	TITLE
2022 September to December 2022	Discount Computer & Electronics	technical troubleshooting Officer
<p>My role and responsibilities as technical troubleshooting Officer are:</p> <ul style="list-style-type: none"> ✓ Troubleshooting PC's, Laptops, and Printers: You were tasked with identifying and diagnosing faults in personal computers, laptops, and printers. This likely involved assessing both hardware and software issues to determine the root cause of problems. ✓ System and Network Problem Solving: You were responsible for diagnosing and resolving system and network-related problems. This could include issues such as connectivity problems, network configuration, and software conflicts. ✓ Hardware Repair and Upgrades: You played a role in repairing and upgrading hardware components of computers. This might have involved replacing faulty components, installing upgrades (such as RAM or hard drives), and ensuring that computers were fully functional. ✓ Anti-Virus Installations and Virus Removal: Assisting clients with anti-virus program installations and virus removals indicates that you were involved in ensuring the security of computers by helping clients protect their systems from malware and viruses. ✓ Client Assistance and Troubleshooting Support: You provided client support by walking them through step-by-step processes to troubleshoot common faults. This likely involved effective communication and guidance to help clients resolve technical issues. 		

Educational Background
